## EXPLANATION OF GROUP SYMBOLS

### GROUPS OF TYPES 11, 12, 13, and 14:

A-Wrappers  
B-Leaf and smoking leaf  
C-Cutters  
X-Lugs and primings  
S-Scrap  
N-Nondescript

### GROUPS OF TYPES 21, 22, 23, and 24:

A-Wrappers  
B-Heavy leaf  
C-Thin leaf  
X-Lugs  
S-Scrap  
N-Nondescript

### GROUPS OF TYPE 31:

A-Wrappers  
B-Bright leaf, red leaf, and tips  
C-Lugs and cutters  
X-Trash and flyings  
S-Scrap  
N-Nondescript

### GROUPS OF TYPE 32:

B-Heavy leaf or dull crop  
C-Thin leaf or bright crop  
X-Seconds and ground leaves  
S-Scrap  
N-Nondescript

### GROUPS OF TYPES 35, 36, and 37:

A-Wrappers  
B-Heavy leaf  
C-Thin leaf  
X-Lugs  
S-Scrap  
N-Nondescript

### GROUPS OF TYPE 41:

B-Binders or tops  
C-Fillers (farm wrappers)  
X-Stemming grades  
Y-Farm fillers or ground leaves  
S-Scrap  
N-Nondescript

### GROUPS OF TYPES 42, 43, and 44:

C-Fillers (farm wrappers)  
X-Stemming grades  
Y-Farm fillers or ground leaves  
S-Scrap  
N-Nondescript

### GROUPS OF TYPE 46:

C-Superior  
X-Inferior  
Y-Defectuosos  
S-Scrap (Picadura)  
N-Nondescript

### GROUPS OF TYPES 51, 52, and 53:

A-Wrappers  
B-Binders, seconds, and brokes  
C-Fillers and short darks  
X-Stemming grades  
Y-Sand-leaf fillers or ground leaves  
S-Scrap  
N-Nondescript

### GROUPS OF TYPES 54 and 55:

B-Binders  
C-Fillers  
X-Stemming grades  
Y-Sand-leaf fillers or bottom leaves  
S-Scrap  
N-Nondescript

### GROUPS OF TYPE 56:

B-Binders  
C-Fillers  
X-Stemming grades  
Y-Ground leaves  
S-Scrap  
N-Nondescript

### GROUPS OF TYPES 61 and 62:

A-Wrappers  
B-Stout wrappers and binders  
C-Fillers or tips  
X-Filler brokes  
S-Scrap  
N-Nondescript

GEN

### GROUPS OF TYPES 81, 82, and 83:

A-Wrappers  
C-Fillers  
S-Scrap

## STOCKS OF LEAF TOBACCO OWNED BY DEALERS AND MANUFACTURERS

### Total Leaf Tobacco Stocks Slightly Higher Than Year Ago

Stocks of all types <sup>1/</sup> of leaf tobacco owned by dealers and manufacturers in the United States and Puerto Rico totaled 2,730,780,000 pounds on April 1, 1945 or 3.3 percent above April 1, 1944 when stocks amounted to 2,643,364,000 pounds. <sup>2/</sup> This increase is due principally to a larger production in 1944 which is now estimated at 1,950,213,000 pounds or 544,017,000 pounds above 1943. It is estimated that around 650 million pounds of the 1944 production of all domestic types combined entered stocks through sales during the quarter January 1 to April 1, 1945. Total stocks for this period, however, showed a net increase of only 94,529,000 pounds.

Domestic cigarette-leaf stocks were approximately 5 percent higher than on April 1, 1944. Practically all of this increase was in Burley stocks. Reported holdings on April 1, 1945 of dark types and cigar-leaf tobacco decreased very slightly from the previous April 1 totals.

Dealers' stocks were reported as 325,520,000 pounds on April 1, 1945. This is 11.9 percent of the total April 1 holdings, while dealers held 9 percent of the total stocks on April 1, 1944. Stocks in the hands of manufacturers were 2,405,260,000 pounds or 88.1 percent of the total reported compared with 91 percent a year ago (See Footnote 2, Table 3).

Commodity Credit Corporation stocks as reported on April 1 were 116 million pounds lower than on January 1, 1945. These stocks on April 1 were 171 million pounds compared with 287 million pounds on January 1. The bulk of CCC stocks consists of flue-cured, which on April 1 totaled 168 million pounds.

---

1/ Figures quoted for type totals in this summary are the sums of unstemmed and stemmed leaf, as reported. Tables in the body of the report show stocks in detail, subdivided according to recognized groupings; stocks on a farm-sales-weight basis; and stocks owned by dealers and manufacturers, separately.

2/ The general instructions for filing the tobacco stocks reports, required of dealers and manufacturers by the War Food Administration, specify that the report shall be made as of the opening of business on the first day of each quarter.

## CIGARETTE STOCKS

### Burley Substantially Up From April 1, 1944 Flue-cured Up Slightly, Maryland Down

Stocks of flue-cured tobacco on April 1, 1945 exceeded those of a year ago by 12,111,000 pounds, which marked the first increase over the previous year on April 1, since 1941. Dealers and manufacturers reported flue-cured stocks totaling 1,207,693,000 as compared with 1,195,582,000 pounds on April 1, 1944. Of all flue-cured stocks on hand, 428,109,000 pounds consisted of Type 11; 439,071,000 pounds of Type 12; 241,193,000 pounds of Type 13; and 99,315,000 pounds of Type 14. For the January - March 1945 quarter flue-cured stocks decreased 255,805,000 pounds. During this period indications were that a much greater amount of stocks held for export were shipped compared with the same quarter a year ago. Marketings in the first quarter this year, however, amounted to around 17 million pounds while additions to stocks through sales after January 1 last year were negligible.

Burley stocks increased 93,049,000 pounds or 12.4 percent over a year ago. Holdings of this type by dealers and manufacturers on April 1, 1945 totaled 843,865,000 pounds which is the highest April 1 figure in four years. Approximately 430 million pounds of Burley tobacco were added to stocks through sales during the first quarter compared with 234 million during the same period last year. January 1, 1945 stocks were 590,387,000 pounds.

Maryland stocks were at the lowest level for April 1 since 1932. Holdings amounted to 26,788,000 pounds which is a decrease of 6,182,000 pounds from a year ago. The addition to stocks of the new crop of Type 32 occurs primarily during the second and third quarters of the year.

Foreign-grown cigarette and smoking tobacco (Turkish and other) reported in stocks on April 1, 1945 totaled 49,312,000 pounds, compared with 58,650,000 pounds a year ago, a decrease of slightly over 9 million pounds.

## DARK TOBACCO STOCKS

### Fire-cured Down Dark Air-cured Higher

Fire-cured stocks were 180,230,000 on April 1, 1945, compared with 189,164,000 pounds reported on April 1, 1944 - a decrease of 4.7 percent. In contrast, dark air-cured stocks increased 8,303,000 pounds with the holdings amounting to 73,808,000 pounds compared with 65,505,000 pounds a year ago. The estimated production in 1944 of all fire-cured types combined was 64.1 million pounds, approximately the same as during the previous year, whereas the dark air-cured production increased 14.5 million pounds with the final estimate placed at 44,514,000 pounds. Stocks of dark types increased over the January 1, 1945 figure as the bulk of sales occur in this period. Fire-cured sales during the January-March period amounted to 54.4 million pounds and dark air-cured 31.3 million pounds. Marketing of the dark types was completed during the first quarter this year although normally sales of fire-cured extend into the second quarter.

Of the total fire-cured stocks reported 27,706,000 pounds were Type 21, Virginia; 109,370,000 pounds, Type 22, Eastern District; 43,066,000 pounds, Type 23, Western District; and 88,000 pounds, Type 24, Henderson Stemming. Henderson Stemming was the only type which did not show an increase from January 1 to April 1, 1945. Production of this type has practically disappeared as growers have resorted to air-curing their crops. April 1, 1945 stocks of dark air-cured tobacco by types were 39,742,000 pounds of Type 35, One Sucker; 30,005,000 pounds, Type 36, Green River; and 4,061,000 pounds, Type 37, Virginia Sun-cured.

### CIGAR STOCKS

#### Filler and Wrapper Stocks

Above April 1, 1944 Levels; Binder Stocks Lower

Cigar filler stocks as a whole were higher than a year ago because of a very large increase in holdings of Puerto Rican tobacco. Much of this increase shows in stocks on the Island. Stocks of all other filler types were below April 1, 1944 levels. Holdings of cigar binder types dropped around 6 percent from April 1, 1944. The largest losses were displayed by Type 52, Connecticut Havana Seed, and Type 54, Southern Wisconsin. Stocks of Connecticut Broadleaf, and New York and Pennsylvania Havana Seed, however, were higher than a year previous. Total wrapper stocks were greater because of an increase of 1,510,000 pounds in Type 61, Connecticut shade-grown. The supply of Type 62, Georgia and Florida shade-grown was less than on April 1 of the foregoing year.

A break-down of the cigar filler stocks by types shows Pennsylvania Seedleaf on April 1, 1945 as 107,889,000 pounds; Gebhardt 16,948,000 pounds; Zimmer, 10,537,000 pounds; Dutch 5,226,000 pounds and Puerto Rican 44,956,000 pounds of which 24,779,000 pounds were in Continental United States and 20,177,000 pounds on the Island.

Of the separate binder types, Connecticut Broadleaf stocks were reported as 26,609,000 pounds; Connecticut Havana Seed 23,202,000 pounds; New York and Pennsylvania Havana Seed 3,130,000 pounds; Southern Wisconsin 32,797,000 pounds; Northern Wisconsin 36,348,000 pounds and Georgia and Florida sun-grown 344,000 pounds.

The bulk of the cigar filler and binder types of tobacco is normally delivered to warehouses during the first quarter; therefore most of these types showed increases over the January 1, 1945 figures. For the 1944 crop, however, a larger than usual proportion of some of the binder types was delivered prior to January 1. Puerto Rican stocks were much higher than on January 1 as the result of large deliveries of the new crop in the first quarter which, according to preliminary estimates, will approximate 36,000,000 pounds.

Stocks of cigar wrapper tobacco were made up of 10,534,000 pounds of Connecticut shade-grown, and 5,066,000 pounds of Georgia and Florida shade-grown. As cigar-wrapper tobacco does not enter stocks during the first quarter, both of these types showed decreases from reported holdings on January 1, 1945.

Stocks of all types of domestic cigar leaf combined, including Puerto Rican, were only slightly below a year ago. April 1, 1945 holdings totaled 323,586,000 pounds compared with 324,241,000 pounds on April 1, 1944.

Foreign-grown cigar-leaf stocks on April 1, 1945 were 23,959,000 pounds, a decrease of 1,026,000 pounds from the corresponding date a year earlier. Of the total Cuba (Havana), was 20,627,000 pounds; Sumatra and Java, 3,144,000 pounds; Philippine Islands (Manila), 68,000 pounds; and Other Foreign-grown cigar-leaf 120,000 pounds. Cuba (Havana) was the only foreign cigar type which showed an increase over April 1, 1944. Sumatra and Java stocks were less than a year ago by 1,554,000 pounds.

Total stocks of Miscellaneous Domestic types on April 1, 1945 were 1,539,000 pounds. Type 71, Eastern Ohio, was reported as 96,000 pounds; Type 72, Perique, 567,000 pounds; and Type 73 Other Miscellaneous Domestic, 876,000 pounds.

NOTE

The table on disappearance is not included in this report as April 1 stocks are not applicable to the marketing year established for any of the various tobacco types. Disappearance by types is shown in the quarterly Tobacco Stocks Reports at the end of respective Marketing years as follows:

January 1

Maryland, Type 32  
Puerto Rican, Type 46

April 1

None

July 1

Flue-cured, Types 11-14  
Georgia and Florida sun-  
grown, Type 56  
Georgia and Florida shade,  
Type 62

October 1

Fire-cured, Types 21-24  
Dark air-cured, Types 35-37  
Burley, Type 31  
Cigar-filler, Types 41-44  
Cigar-binder, Types 51-55  
Connecticut shade, Type 61

Table 1.-Stocks of leaf tobacco, by types and groups of grades, owned by dealers  
and manufacturers, April 1, 1945, compared with January 1, 1945

1/ Subject to revision.

2/ See supplementary Burley report on page 13.

3/ Possible error being checked.

4/ Although Type 73, is defined as all domestic types of tobacco not otherwise classified, the bulk of the stocks reported in this type consists of cuttings, clippings, and trimmings. This is the result, in most instances, of the inability of reporters to designate cuttings, clippings, and trimmings in the "S" group of the types to which they properly belong.

5/ Does not include stocks owned by Netherlands Indies Produce Corporation held in the free trade zone.

\* Revisions in January 1 report.

1/ These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers, quasi-manufacturers, growers' cooperative associations, warehousemen, brokers, holders, and owners subject to provisions of The Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress. The quantities owned by dealers and manufacturers have been tabulated separately on a type total basis. Figures are as reported to date; no revisions of this table will be made.

2/ The quantities shown as owned by manufacturers include tobacco which is held under dealer registries of manufacturers and also tobacco held by dealers and known to be purchased on order for foreign or domestic manufacturers. The quantities shown in the manufacturers' column also include stocks purchased under agreement with the Commodity Credit Corporation which are earmarked for export and are not actually available to manufacturers; these stocks are reported as approximately 171 million pounds, 168 million of which consist of flue-cured. The quantities shown as owned by dealers may include some tobacco held by dealers which is earmarked for sale to domestic manufacturers or for export. The table should therefore be considered as representing only the approximate quantities owned respectively by dealers and manufacturers.

3/ Includes stocks on the Island of Puerto Rico.

4/ Possible error being checked.

5/ For explanation of stocks included in this classification see footnote 4 on page 12.

6/ Does not include stocks owned by Netherlands Indies Produce Corporation held in the free trade zone.

Table 4 .- Conversion factors for adjusting for losses in weight incident to stemming, handling, sweating, and drying, all types of tobacco

Type	U.S. type number	Factors to multiply by to convert weights	
		Stemmed stocks to unstemmed equivalent	Unstemmed stocks to farm-sales weight
